

LINER

Universal HTM71 Liner

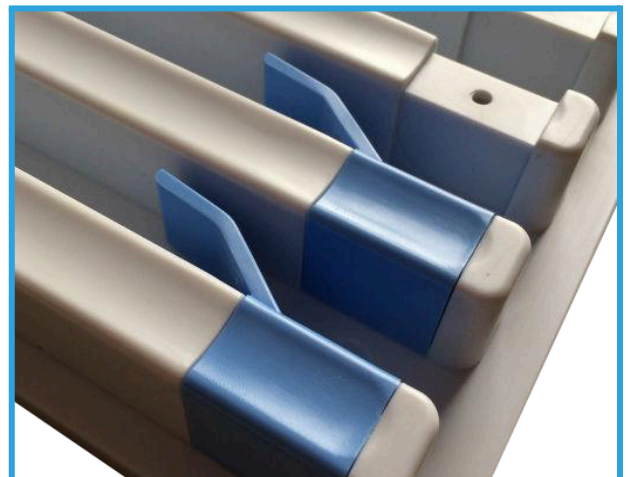

HTM71 storage cabinets and trolleys can be fitted with our Universal HTM71 Liner, allowing standard 600 x 400mm HTM71 trays to slide into place and be secured using the HTM71 Arrester Clip, preventing accidental removal during use. The arrester also allows trays to be held at an angle for improved access.

Liners are manufactured from ABS plastic and are suitable for installation into base units, wall units, and full height cabinets built to HTM71 specifications.

455mm and 655mm wide HTM71 cabinetry is designed to comply with NHS HTM71 Health Technical Memorandum: Materials Management Modular Storage.

A major benefit of the HTM71 system is the ability to label and compartmentalise each individual tray for product identification, colour coding, or a combination of both.

Sizes (mm)	Weight
390(w) x 652(h) x 28(d)	1.5kg
