

CLEAR100LD

HTM71 Tray Divider

Description

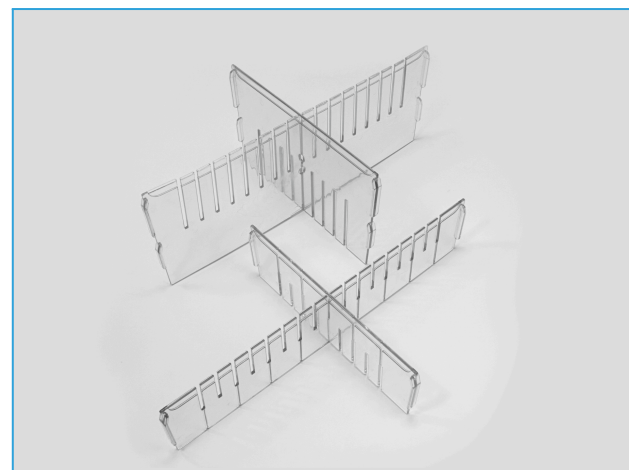

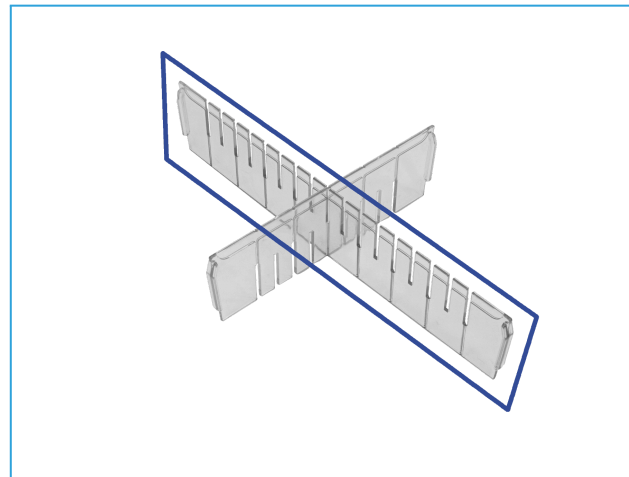

100mm deep tray divider for use within HTM71 full size trays.

The injection moulded dividers are high quality, durable, light, hygienic and extremely strong.

Features

A key component to the HTM71 system are the tray dividers. A major benefit of the HTM71 system is the ability to label and compartmentalise each individual tray which is made possible with the optional tray dividers.

Labels can be used for product identification, colour coding or a combination of both. All HTM71 capable systems can receive and use the tray. This could be cabinets, shelving or mobiles & trolleys.

Sizes (mm)

600 x 100 x 5mm
